

Experienced Cybersecurity Analyst with 3+ years of hands-on expertise in penetration testing, vulnerability assessment, and security framework implementation. Proficient in identifying system vulnerabilities, applying cybersecurity best practices, and delivering actionable recommendations to enhance the security posture of organizations. Possesses strong expertise in managing security assessments across government, IT & ITES, FinTech, and e-commerce sectors. Committed to driving continuous improvement in security infrastructures, implementing proactive risk mitigation strategies, and safeguarding sensitive data within dynamic cybersecurity environments.

Professional Summary

- Client Handling:** Managing application security (AppSec) processes for clients, ensuring compliance and risk mitigation and Acted as the primary point of contact for clients, addressing queries, issues, and escalations.
- Cybersecurity Expertise:** Extensive experience in performing security assessments, penetration testing, vulnerability analysis, and audits for Web, Mobile, API, Thick Client and Network environments.
- Penetration Testing:** Skilled in identifying and resolving vulnerabilities through penetration testing across various platforms, strengthening system defenses.
- AI Security & Pentesting Automation:** Developed AI-driven security agents to assist with penetration testing tasks, vulnerability discovery, and attack simulations.
- Pentesting Tool Automation:** Built automation tools to streamline penetration testing workflows, improving efficiency in reconnaissance, vulnerability scanning, and exploitation processes.
- Device Binding:** Performed device binding verification in compliance with RBI and NPCI guidelines.
- Cloud Review:** Managed cloud configuration review, enhancing security for enterprise cloud environments and ensuring data protection.
- Phishing Activities:** Experienced in executing and managing phishing campaigns to evaluate user awareness, assess security posture, and enhance organizational resilience against social engineering threats.
- Risk Mitigation and Reporting:** Delivered actionable security recommendations and risk mitigation plans, contributing to the continuous improvement of client security frameworks.

Career Timeline

Aug 2025 - Present	Security Analyst III WeSecureApp Private Limited (Now Strobes)
Jul 2024 - Aug 2025	Security Analyst II WeSecureApp Private Limited (Now Strobes)
Feb 2024 - Present	Security Analyst I WeSecureApp Private Limited (Now Strobes)
Apr 2023 - Feb 2024	Junior Security Analyst WeSecureApp Private Limited (Now Strobes)
Jan 2023 - Apr 2023	Cybersecurity Intern WeSecureApp Private Limited (Now Strobes)
Jul 2022 - Sep 2022	Cyber Security Intern PHOTOSHOOTO

Work Experience

Aug 2025 - Present	Security Analyst III WeSecureApp Private Limited (Now Strobes)
--------------------	---

Soft Skills

- Communication
- Collaboration
- Problem-solving
- Analytical
- Adaptability
- Attention to Detail
- Time Management
- Self-motivated
- Teamwork
- Creativity

Technical Skills

- Penetration Testing
- Vulnerability Assessment
- Risk Management
- Cloud Config Review
- Thick Client
- Phishing
- Source Code review
- SAST / DAST / SCA

Core Competencies

- Cybersecurity Expertise
- Technical Proficiency
- Risk Assessment & Management
- Communication & Collaboration
- Bug Bounty

Certifications

- Certified Ethical Hacker (C|EH)
- Texial Information Security Auditor
- CCNA Routing & Switching
- CCNA Security
- MCRTA
- ADRTS

Education

- Diploma In Electronics and Communication
BVVS Polytechnic (Autonomous), Bagalkot
- BCA
Maninal University, Jaipur

Languages

Steered comprehensive security assessments, including penetration testing, cloud security reviews, client handling, and delivering actionable security recommendations to enhance overall system defenses and client security frameworks.

- **Client Handling:** Managed application security (AppSec) processes for clients, ensuring compliance, risk mitigation, and secure development practices. Acted as the primary point of contact for clients, addressing security queries, issues, and escalations.
- **Penetration Testing:** Performed comprehensive penetration testing across web applications, mobile applications (Android & iOS), APIs, thick clients, and network environments, identifying vulnerabilities and strengthening overall system defenses.
- **AI Security & Pentesting Automation:** Developed AI-driven security agents to assist with penetration testing tasks, vulnerability discovery, and attack simulations.
- **Red Teaming Engagements:** Executed red teaming exercises to simulate real-world attack scenarios, testing the effectiveness of security controls, detection mechanisms, and incident response capabilities.
- **Vulnerability Identification:** Identified security weaknesses across multiple system layers and provided detailed vulnerability reports with risk ratings and remediation guidance.
- **Source Code Reviews:** Conducted secure source code reviews to identify security flaws such as injection vulnerabilities, authentication issues, insecure data handling, and business logic flaws.
- **Device Binding Assessments:** Performed device binding verification in compliance with RBI and NPCI security guidelines, ensuring secure device-level authentication mechanisms for financial applications.
- **Cloud Security Assessments:** Led cloud security assessments focusing on configuration reviews, identity and access management, and security posture improvement for enterprise cloud environments.
- **AI Security & Pentesting Automation:** Developed AI-driven security agents to assist with penetration testing tasks, vulnerability discovery, and attack simulations.
- **Pentesting Tool Automation:** Built automation tools to streamline penetration testing workflows, improving efficiency in reconnaissance, vulnerability scanning, and exploitation processes.
- **Security Recommendations:** Delivered actionable security recommendations and remediation guidance, contributing to the continuous improvement of client security frameworks and infrastructure.

Jul 2024 - Aug 2025

Security Analyst II

WeSecureApp Private Limited (Now Strobes)

Steered comprehensive security assessments including penetration testing, cloud security reviews, client handling, and delivering actionable security recommendations to enhance overall system defenses and client security frameworks.

- **Client Handling:** Managed application security (AppSec) processes for clients, ensuring compliance and risk mitigation, and acted as the primary point of contact for clients, addressing queries, issues, and escalations.
- **Penetration Testing:** Performed penetration testing for web, mobile, API, thick client, and network environments, identifying vulnerabilities and strengthening system defenses.
- **Vulnerability Identification:** Identified security weaknesses within various system layers, providing critical insights for improving security measures.
- **Device Binding:** Performed Device binding verification in compliance with RBI and NPCI guidelines.
- **Cloud Security Assessments:** Led cloud security assessments, focusing on configuration reviews and security posture enhancement for enterprise cloud environments.
- **Security Recommendations:** Delivered actionable security recommendations, contributing to the continuous improvement of client security frameworks and infrastructure.

Feb 2024 - Present

Security Analyst I

WeSecureApp Private Limited (Now Strobes) (Hyderabad, India)

Steered comprehensive security assessments including penetration testing, cloud security reviews, and delivering actionable security recommendations to enhance overall system defenses and client security frameworks.

- **Penetration Testing:** Performed penetration testing for web, mobile, API, Thick Client and network environments, identifying vulnerabilities and strengthening system defenses.

Achievements

- Recognized for identifying and reporting high-impact security vulnerabilities in bug bounty programs, demonstrating expertise in web and application security, effective communication, timely project delivery, and adherence to responsible disclosure guidelines to ensure client satisfaction.

- **Vulnerability Identification:** Identified security weaknesses within various system layers, providing critical insights for improving security measures.
- **Device Binding:** Performed Device binding verification in compliance with RBI and NPCI guidelines.
- **Cloud Security Assessments:** Led cloud security assessments, focusing on configuration reviews and security posture enhancement for enterprise cloud environments.
- **Security Recommendations:** Delivered actionable security recommendations, contributing to the continuous improvement of client security frameworks and infrastructure.

Apr 2023 - Feb 2024

Junior Security Analyst

WeSecureApp Private Limited (Now Strobes) (Hyderabad, India)

Administered comprehensive security assessments, including penetration testing, network vulnerability analysis, and risk mitigation, to enhance client security frameworks and safeguard sensitive data.

- **Security Assessments:** Administered a wide range of security assessments, including penetration testing for web, mobile, and API applications, successfully identifying and resolving vulnerabilities.
- **Network Penetration Testing:** Led extensive network penetration tests to identify weaknesses within the organization's network infrastructure, enhancing overall security posture.
- **Security Reporting:** Generated detailed security analysis reports, outlining identified vulnerabilities, risks, and recommended actions.
- **Risk Mitigation:** Developed strategic risk mitigation plans to address security weaknesses, ensuring comprehensive protection for client systems.
- **Client Security Frameworks:** Contributed to the enhancement of client security frameworks through targeted recommendations and continuous improvement initiatives.

Jan 2023 - Apr 2023

Cybersecurity Intern

WeSecureApp Private Limited (Now Strobes) (Hyderabad, India)

Conducted vulnerability assessments, and applied cybersecurity frameworks to enhance the security posture of the web, mobile, and enterprise systems.

- **Cybersecurity Experience:** Gained exposure to cybersecurity through practical security labs and real-world projects, focusing on the security of web and mobile applications.
- **Vulnerability Assessment Collaboration:** Partnered with senior analysts to conduct detailed vulnerability assessments, identifying security gaps and recommending actionable remediation strategies.

Jul 2022 - Sep 2022

Cyber Security Intern

PHOTOSHOOTO (Bengaluru)

Conducted vulnerability assessments, and applied cybersecurity frameworks to enhance the security posture of the web, mobile, and enterprise systems.

- **Cybersecurity Experience:** Gained exposure to cybersecurity through practical security labs and real-world projects, focusing on the security of web and mobile applications.
- **Vulnerability Assessment Collaboration:** Partnered with senior analysts to conduct detailed vulnerability assessments, identifying security gaps and recommending actionable remediation strategies.

Tools

- **Penetration Testing:** Burp Suite, Metasploit, Kali Linux, Nessus, Nmap, Nikto, EvilWinPCC, Gophish.
- **Mobile Pentesting:** Frida, Jadx, APKtool, Objection.
- **Cloud Security:** Prowler
